Small, but Mighty
With a footprint of only 24" by 15", you can use the InMotion Compact Strider just about anywhere, sitting or standing. This versatility allows you to pedal while you're at the office or during a more intense workout at home - it's your choice. Plus, the resistance tubes allow you to work your upper body as well, just like a full-sized elliptical.

Getting the Most Out of Your Workout
Customizing the intensity of your workout is easy with the adjustable tension. Simply choose the level that's right for you and pedal away. You can also work the elliptical in the reverse direction to target different muscle groups. And if you need more guidance during your workout, fear not. This model comes with a mini strider workout DVD and free online access to two workout videos.

Staying Motivated
Tracking your progress is a breeze with the multi-function monitor. Your strides per minute, total number of strides, exercise time and calories burned are displayed on the monitor. You can even scan through all the stats. So if you're ready for effective, convenient cardio, you're ready for the InMotion Compact Strider.

GREAT FOR GAMERS: Get an effective workout while gaming - passive, low-attention exercise promotes leg movement and improved circulation in a non-distracting way while playing video games.
